

# Expedited Application Review Information

In some situations, the Department of Local Services Permitting Division may offer a paid expedited review of permit applications. The purpose of expedited review is to increase the Division's review capacity, reduce the backlog of applications awaiting plan review, and shorten review timelines for all applicants.

Several factors determine if an application can be accepted for expedited review, including:

- Type of permit
- Availability of expedited review resources
- Completeness of the application

## How does it work?

Applicants desiring expedited review must submit an Expedited Review Request Form. The Division will contact the applicant before the requested expedited review begins to confirm resource availability and request payment of the expedited review fee.

## How much does it cost?

Expedited review fees shall be an additional fifty percent of the regular review fee per KCC 27.02.090, or fee charged by the consultant assigned to the review. Expedited review fees are due at the time the Division confirms with the applicant that the requested expedited review services are available.

For questions regarding this program, you may contact the Permitting Division by email:
