

SEPA ENVIRONMENTAL CHECKLIST

Purpose of checklist:

Governmental agencies use this checklist to help determine whether the environmental impacts of your proposal are significant. This information is also helpful to determine if available avoidance, minimization or compensatory mitigation measures will address the probable significant impacts or if an environmental impact statement will be prepared to further analyze the proposal.

Instructions for applicants:

This environmental checklist asks you to describe some basic information about your proposal. Please answer each question accurately and carefully, to the best of your knowledge. You may need to consult with an agency specialist or private consultant for some questions. You may use "not applicable" or "does not apply" only when you can explain why it does not apply and not when the answer is unknown. You may also attach or incorporate by reference additional studies reports. Complete and accurate answers to these questions often avoid delays with the SEPA process as well as later in the decision-making process.

The checklist questions apply to all parts of your proposal, even if you plan to do them over a period of time or on different parcels of land. Attach any additional information that will help describe your proposal or its environmental effects. The agency to which you submit this checklist may ask you to explain your answers or provide additional information reasonably related to determining if there may be significant adverse impact.

Instructions for Lead Agencies:

Please adjust the format of this template as needed. Additional information may be necessary to evaluate the existing environment, all interrelated aspects of the proposal and an analysis of adverse impacts. The checklist is considered the first but not necessarily the only source of information needed to make an adequate threshold determination. Once a threshold determination is made, the lead agency is responsible for the completeness and accuracy of the checklist and other supporting documents.

Use of checklist for nonproject proposals:

For nonproject proposals (such as ordinances, regulations, plans and programs), complete the applicable parts of sections A and B plus the [SUPPLEMENTAL SHEET FOR NONPROJECT ACTIONS \(part D\)](#). Please completely answer all questions that apply and note that the words "project," "applicant," and "property or site" should be read as "proposal," "proponent," and "affected geographic area," respectively. The lead agency may exclude (for non-projects) questions in Part B - Environmental Elements –that do not contribute meaningfully to the analysis of the proposal.

A. Background [\[HELP\]](#)

1. Name of proposed project, if applicable:
 - PREA21-0041 / ENFR20-0757, Parcel #3522029105
2. Name of applicant:
 - Eric Hartmann
3. Address and phone number of applicant and contact person:

- 28300 137th Ave SW Vashon, WA 98070 – 206.769.6709
4. Date checklist prepared:
 - 03-29-22
 5. Agency requesting checklist:
 - King County Permitting Division Department of Local Services
 6. Proposed timing or schedule (including phasing, if applicable):
 - ASAP
 7. Do you have any plans for future additions, expansion, or further activity related to or connected with this proposal? If yes, explain.
 - 3 year maintenance and monitoring plan required after installation of restoration work.
 8. List any environmental information you know about that has been prepared, or will be prepared, directly related to this proposal.
 - Critical Areas Designation prepared by Altmann Oliver Associates, LLC (CADS20-0299)
 - Restoration Letter Prepared by Altmann Oliver Associates, LLC
 - Hartmann Property - Wetland Buffer Restoration Plan by Altmann Oliver Associates, LLC
 9. Do you know whether applications are pending for governmental approvals of other proposals directly affecting the property covered by your proposal? If yes, explain.
 - N/A
 10. List any government approvals or permits that will be needed for your proposal, if known.
 - N/A
 11. Give brief, complete description of your proposal, including the proposed uses and the size of the project and site. There are several questions later in this checklist that ask you to describe certain aspects of your proposal. You do not need to repeat those answers on this page. (Lead agencies may modify this form to include additional specific information on project description.)
 - The Wetland Buffer Restoration Plan includes replanting a 2,686 sf area of cleared blackberry with native trees and shrubs to increase the habitat value and plant species and structural diversity of and area of the same square footage that was cleared.
 - The total lot size is 435,600 sf.
 12. Location of the proposal. Give sufficient information for a person to understand the precise location of your proposed project, including a street address, if any, and section, township, and range, if known. If a proposal would occur over a range of area, provide the range or boundaries of the site(s). Provide a legal description, site plan, vicinity map, and topographic map, if reasonably available. While you should submit any plans required by the agency, you are not required to duplicate maps or detailed plans submitted with any permit applications related to this checklist.
 - 28300 – 137th Ave SW. King County, WA (Parcel 352202-9105)
 - S35, T22N, R2E
 - S 3/4 OF SE 1/4 OF NW 1/4 OF SE 1/4 & N 1/4 OF NE 1/4 OF SW 1/4 OF SE 1/4
 - See Wetland Buffer Restoration Plan

B. Environmental Elements [\[HELP\]](#)

1. Earth [\[help\]](#)

- a. General description of the site:

(circle one): Flat, rolling, hilly, steep slopes, mountainous, other _____

- b. What is the steepest slope on the site (approximate percent slope)?
- ~17%
- c. What general types of soils are found on the site (for example, clay, sand, gravel, peat, muck)? If you know the classification of agricultural soils, specify them and note any agricultural land of long-term commercial significance and whether the proposal results in removing any of these soils.
- Alderwood gravelly sandy loam, 0 to 8 percent slopes
 - Everett-Alderwood gravelly sandy loams, 6 to 15 percent slopes
- d. Are there surface indications or history of unstable soils in the immediate vicinity? If so, describe.
- N/A
- e. Describe the purpose, type, total area, and approximate quantities and total affected area of any filling, excavation, and grading proposed. Indicate source of fill.
- Part of the violation included removal of ~ 90 cubic yards of sediment from the historically excavated portion southern farm pond in Wetland A.
- f. Could erosion occur as a result of clearing, construction, or use? If so, generally describe.
- N/A
- g. About what percent of the site will be covered with impervious surfaces after project construction (for example, asphalt or buildings)?
- ~2.4%
- h. Proposed measures to reduce or control erosion, or other impacts to the earth, if any:
- Native plantings along the pond edge should help stabilize the soil.

2. **Air** [\[help\]](#)

- a. What types of emissions to the air would result from the proposal during construction, operation, and maintenance when the project is completed? If any, generally describe and give approximate quantities if known.
- Typical emissions of cars.
 - Emissions of a truck / trailer delivering plants.
- b. Are there any off-site sources of emissions or odor that may affect your proposal? If so, generally describe.
- N/A
- c. Proposed measures to reduce or control emissions or other impacts to air, if any:
- N/A

3. **Water** [\[help\]](#)

a. Surface Water: [\[help\]](#)

- 1) Is there any surface water body on or in the immediate vicinity of the site (including year-round and seasonal streams, saltwater, lakes, ponds, wetlands)? If yes, describe type and provide names. If appropriate, state what stream or river it flows into.
- One wetland (Wetland A) and one stream (Stream 1) are located within the central portion of the property. The northern portion of Wetland A consists of a shallow topographic swale that drains from north to south. Runoff from the wetland drains through a small culvert beneath the existing driveway to the barn and into two historically excavated seasonal farm ponds that were apparently lined with clay at the time of excavation. Seasonal overflow runoff from the south pond drains into a second culvert that discharges in the far southern portion of the site and forms Stream 1. Wetland A meets the criteria for a Category II wetland with 6 Habitat Points.

Category II wetlands with 6 Habitat Points require a standard 110-foot buffer plus 15-foot building setback from the wetland edge. Stream 1 is a Type N Aquatic Area and requires a 65-foot buffer and 15-foot building setback.

- 2) Will the project require any work over, in, or adjacent to (within 200 feet) the described waters? If yes, please describe and attach available plans.
 - Yes, the planting area is along the pond edge. (See attached Wetland Buffer Restoration Plan).
- 3) Estimate the amount of fill and dredge material that would be placed in or removed from surface water or wetlands and indicate the area of the site that would be affected. Indicate the source of fill material.
 - ~90 cubic yards was removed from the wetland and exported off-site.
- 4) Will the proposal require surface water withdrawals or diversions? Give general description, purpose, and approximate quantities if known.
 - N/A
- 5) Does the proposal lie within a 100-year floodplain? If so, note location on the site plan.
 - N/A
- 6) Does the proposal involve any discharges of waste materials to surface waters? If so, describe the type of waste and anticipated volume of discharge.
 - N/A

b. Ground Water: [\[help\]](#)

- 1) Will groundwater be withdrawn from a well for drinking water or other purposes? If so, give a general description of the well, proposed uses and approximate quantities withdrawn from the well. Will water be discharged to groundwater? Give general description, purpose, and approximate quantities if known.
 - N/A
- 2) Describe waste material that will be discharged into the ground from septic tanks or other sources, if any (for example: Domestic sewage; industrial, containing the following chemicals. . . ; agricultural; etc.). Describe the general size of the system, the number of such systems, the number of houses to be served (if applicable), or the number of animals or humans the system(s) are expected to serve.
 - N/A

c. Water runoff (including stormwater):

- 1) Describe the source of runoff (including storm water) and method of collection and disposal, if any (include quantities, if known). Where will this water flow? Will this water flow into other waters? If so, describe.
 - N/A
- 2) Could waste materials enter ground or surface waters? If so, generally describe.
 - N/A
- 3) Does the proposal alter or otherwise affect drainage patterns in the vicinity of the site? If so, describe.
 - N/A

d. Proposed measures to reduce or control surface, ground, and runoff water, and drainage pattern impacts, if any:

- N/A

4. Plants [\[help\]](#)

a. Check the types of vegetation found on the site:

__x__deciduous tree: alder, maple, aspen, other

- evergreen tree: fir, cedar, pine, other
- shrubs
- grass
- pasture
- crop or grain
- Orchards, vineyards or other permanent crops.
- wet soil plants: cattail, buttercup, bullrush, skunk cabbage, other
- water plants: water lily, eelgrass, milfoil, other
- other types of vegetation

- b. What kind and amount of vegetation will be removed or altered?
- After installation and following every monitoring event for a period of three years, exotic and invasive plant species will be maintained at levels below 10% total cover in all planted areas.
 - The violation included removal of Himalayan blackberry, pruning of black cottonwood, and pruning of willow.
- c. List threatened and endangered species known to be on or near the site.
- N/A
- d. Proposed landscaping, use of native plants, or other measures to preserve or enhance vegetation on the site, if any:
- 7 native trees and 25 native shrubs will be planted along the pond edge as part of the Wetland Buffer Restoration Plan. 75 native trees and shrubs have already been planted by the owner in the restoration area.
- e. List all noxious weeds and invasive species known to be on or near the site.
- Himalayan blackberry.

5. **Animals** [\[help\]](#)

- a. List any birds and other animals which have been observed on or near the site or are known to be on or near the site.

Examples include:

birds: hawk, heron, eagle, songbirds, other:
 mammals: deer, bear, elk, beaver, other:
 fish: bass, salmon, trout, herring, shellfish, other _____

- Cutthroat
- b. List any threatened and endangered species known to be on or near the site.
- N/A
- c. Is the site part of a migration route? If so, explain.
- N/A
- d. Proposed measures to preserve or enhance wildlife, if any:
- Wetland Buffer Restoration Plan
- e. List any invasive animal species known to be on or near the site.
- N/A

6. **Energy and Natural Resources** [\[help\]](#)

- a. What kinds of energy (electric, natural gas, oil, wood stove, solar) will be used to meet the completed project's energy needs? Describe whether it will be used for heating, manufacturing, etc.
 - N/A
- b. Would your project affect the potential use of solar energy by adjacent properties? If so, generally describe.
 - N/A
- c. What kinds of energy conservation features are included in the plans of this proposal? List other proposed measures to reduce or control energy impacts, if any:
 - N/A

7. Environmental Health [\[help\]](#)

- a. Are there any environmental health hazards, including exposure to toxic chemicals, risk of fire and explosion, spill, or hazardous waste, that could occur as a result of this proposal? If so, describe.
 - 1) Describe any known or possible contamination at the site from present or past uses.
 - N/A
 - 2) Describe existing hazardous chemicals/conditions that might affect project development and design. This includes underground hazardous liquid and gas transmission pipelines located within the project area and in the vicinity.
 - N/A
 - 3) Describe any toxic or hazardous chemicals that might be stored, used, or produced during the project's development or construction, or at any time during the operating life of the project.
 - N/A
 - 4) Describe special emergency services that might be required.
 - N/A
 - 5) Proposed measures to reduce or control environmental health hazards, if any:
 - N/A

b. Noise

- 1) What types of noise exist in the area which may affect your project (for example: traffic, equipment, operation, other)?
 - Trucks
 - Cars
- 2) What types and levels of noise would be created by or associated with the project on a short-term or a long-term basis (for example: traffic, construction, operation, other)? Indicate what hours noise would come from the site.
 - Trucks (short term)
 - Cars (existing)
 - Shoveling (short term)
 - Weed control tools (seasonally 3 years)
 - Watering (seasonally 3 years)
 - All noise would be typical work hours during the day.
- 3) Proposed measures to reduce or control noise impacts, if any:
 - N/A

8. Land and Shoreline Use [\[help\]](#)

- a. What is the current use of the site and adjacent properties? Will the proposal affect current land uses on nearby or adjacent properties? If so, describe.
 - Single family housing
- b. Has the project site been used as working farmlands or working forest lands? If so, describe. How much agricultural or forest land of long-term commercial significance will be converted to other uses as a result of the proposal, if any? If resource lands have not been designated, how many acres in farmland or forest land tax status will be converted to nonfarm or nonforest use?
 - Not known, not changed
- 1) Will the proposal affect or be affected by surrounding working farm or forest land normal business operations, such as oversize equipment access, the application of pesticides, tilling, and harvesting? If so, how:
 - No
- c. Describe any structures on the site.
 - 1 single family residence
 - 1 barn
 - 1 shed
- d. Will any structures be demolished? If so, what?
 - No
- e. What is the current zoning classification of the site?
 - RA-10-SO
- f. What is the current comprehensive plan designation of the site?
 - RA
- g. If applicable, what is the current shoreline master program designation of the site?
 - N/A
- h. Has any part of the site been classified as a critical area by the city or county? If so, specify.
 - Yes, Wetland A Cat. II with 6 habitat points and Stream 1 Type N
- i. Approximately how many people would reside or work in the completed project?
 - Project does not involve new structures.
- j. Approximately how many people would the completed project displace?
 - 0
- k. Proposed measures to avoid or reduce displacement impacts, if any:
 - N/A
- L. Proposed measures to ensure the proposal is compatible with existing and projected land uses and plans, if any:
 - N/A
- m. Proposed measures to reduce or control impacts to agricultural and forest lands of long-term commercial significance, if any:
 - N/A

9. Housing [\[help\]](#)

- a. Approximately how many units would be provided, if any? Indicate whether high, middle, or low-income housing.
 - N/A
- b. Approximately how many units, if any, would be eliminated? Indicate whether high, middle, or low-income housing.
 - N/A
- c. Proposed measures to reduce or control housing impacts, if any:

- N/A

10. Aesthetics [\[help\]](#)

- a. What is the tallest height of any proposed structure(s), not including antennas; what is the principal exterior building material(s) proposed?
 - N/A
- b. What views in the immediate vicinity would be altered or obstructed?
 - N/A
- b. Proposed measures to reduce or control aesthetic impacts, if any:
 - N/A

11. Light and Glare [\[help\]](#)

- a. What type of light or glare will the proposal produce? What time of day would it mainly occur?
 - N/A
- b. Could light or glare from the finished project be a safety hazard or interfere with views?
 - N/A
- c. What existing off-site sources of light or glare may affect your proposal?
 - N/A
- d. Proposed measures to reduce or control light and glare impacts, if any:
 - N/A

12. Recreation [\[help\]](#)

- a. What designated and informal recreational opportunities are in the immediate vicinity?
 - N/A
- b. Would the proposed project displace any existing recreational uses? If so, describe.
 - No
- c. Proposed measures to reduce or control impacts on recreation, including recreation opportunities to be provided by the project or applicant, if any:
 - N/A

13. Historic and cultural preservation [\[help\]](#)

- a. Are there any buildings, structures, or sites, located on or near the site that are over 45 years old listed in or eligible for listing in national, state, or local preservation registers ? If so, specifically describe.
 - No
- b. Are there any landmarks, features, or other evidence of Indian or historic use or occupation? This may include human burials or old cemeteries. Are there any material evidence, artifacts, or areas of cultural importance on or near the site? Please list any professional studies conducted at the site to identify such resources.
 - None known
- c. Describe the methods used to assess the potential impacts to cultural and historic resources on or near the project site. Examples include consultation with tribes and the department of archeology and historic preservation, archaeological surveys, historic maps, GIS data, etc.
 - N/A
- d. Proposed measures to avoid, minimize, or compensate for loss, changes to, and disturbance to resources. Please include plans for the above and any permits that may be required.
 - N/A

14. Transportation [\[help\]](#)

- a. Identify public streets and highways serving the site or affected geographic area and describe proposed access to the existing street system. Show on site plans, if any.
 - 137th Ave SW using the existing driveway.
- b. Is the site or affected geographic area currently served by public transit? If so, generally describe. If not, what is the approximate distance to the nearest transit stop?
 - No and ~2 mi to ferry terminal stop.
- c. How many additional parking spaces would the completed project or non-project proposal have? How many would the project or proposal eliminate?
 - N/A
- d. Will the proposal require any new or improvements to existing roads, streets, pedestrian, bicycle or state transportation facilities, not including driveways? If so, generally describe (indicate whether public or private).
 - NO
- e. Will the project or proposal use (or occur in the immediate vicinity of) water, rail, or air transportation? If so, generally describe.
 - Accessing the site may require use of ferry for landscapers and biologists until 3 year maintenance and monitoring period is completed.
- f. How many vehicular trips per day would be generated by the completed project or proposal? If known, indicate when peak volumes would occur and what percentage of the volume would be trucks (such as commercial and nonpassenger vehicles). What data or transportation models were used to make these estimates?
 - ~4-6 trips a year until 3 year maintenance and monitoring period is completed.
- g. Will the proposal interfere with, affect or be affected by the movement of agricultural and forest products on roads or streets in the area? If so, generally describe.
 - No
- h. Proposed measures to reduce or control transportation impacts, if any:
 - N/A

15. Public Services [\[help\]](#)

- a. Would the project result in an increased need for public services (for example: fire protection, police protection, public transit, health care, schools, other)? If so, generally describe.
 - N/A
- b. Proposed measures to reduce or control direct impacts on public services, if any.
 - N/A

16. Utilities [\[help\]](#)

- a. Circle utilities currently available at the site:
 electricity, natural gas, water, refuse service, telephone, sanitary sewer, septic system,
 other _____
- b. Describe the utilities that are proposed for the project, the utility providing the service, and the general construction activities on the site or in the immediate vicinity which might be needed.
 - Water for the first 2 years after planting

C. Signature [\[HELP\]](#)

The above answers are true and complete to the best of my knowledge. I understand that the lead agency is relying on them to make its decision.

Signature: Eric Hartmann

Name of signee Eric Harmann

Position and Agency/Organization Owner

Date Submitted: 3-29-22

D. Supplemental sheet for nonproject actions [\[HELP\]](#)

(IT IS NOT NECESSARY to use this sheet for project actions)

Because these questions are very general, it may be helpful to read them in conjunction with the list of the elements of the environment.

When answering these questions, be aware of the extent the proposal, or the types of activities likely to result from the proposal, would affect the item at a greater intensity or at a faster rate than if the proposal were not implemented. Respond briefly and in general terms.

1. How would the proposal be likely to increase discharge to water; emissions to air; production, storage, or release of toxic or hazardous substances; or production of noise?

- N/A

Proposed measures to avoid or reduce such increases are:

- N/A

2. How would the proposal be likely to affect plants, animals, fish, or marine life?

- Beneficial, more diverse plant community.

Proposed measures to protect or conserve plants, animals, fish, or marine life are:

- Planting

3. How would the proposal be likely to deplete energy or natural resources?

- N/A

Proposed measures to protect or conserve energy and natural resources are:

- N/A

4. How would the proposal be likely to use or affect environmentally sensitive areas or areas designated (or eligible or under study) for governmental protection; such as parks, wilderness, wild and scenic rivers, threatened or endangered species habitat, historic or cultural sites, wetlands, floodplains, or prime farmlands?

- Restores impacted wetland buffer

Proposed measures to protect such resources or to avoid or reduce impacts are:

- See plan

5. How would the proposal be likely to affect land and shoreline use, including whether it would allow or encourage land or shoreline uses incompatible with existing plans?

- N/A

Proposed measures to avoid or reduce shoreline and land use impacts are:

- N/A
6. How would the proposal be likely to increase demands on transportation or public services and utilities?
- N/A
- Proposed measures to reduce or respond to such demand(s) are:
- N/A
7. Identify, if possible, whether the proposal may conflict with local, state, or federal laws or requirements for the protection of the environment.
- N/A
